

# Nova Cells Institute of Mexico Cancer Treatment

Patients receive timed, pulsed infusions of donor cancer-fighting immune cells (granulocytes) harvested from young people plus HLA mismatched human umbilical cord stem cells.

The granulocytes directly attack tumor cells and eradicate them. The cord blood stem cells are attracted to tumors, engraft in them, and are attacked by the patient's own cancer fighting immune cells and also by the donor granulocytes (These cord blood stem cells are flagged as foreign in the patient's body).

They also receive:

- Customized diet rich in cancer-fighting compounds
- Specific regimen of drugs, supplements & etc. all geared to compromise key metabolic pathways in tumor cells.

All medical procedures as well as any laboratory processing is done in Mexico.

Immunologic & Metabolic Oncolytic (Cancer Killing) Approach to killing off tumor cells

NCIM ACCEPTS:

Advanced cases

Disseminated malignancy

NCIM Laboratory Director: Dr. Abel Pena

B.S. in biochemistry, *Escuela Nacional De Ciencias Biologicas*; medical studies at the *Instituto Politecnico Nacional Casco De Santo Tomas* (Mexico City) with a focus on becoming a general surgeon and obstetrician

Hands-on training in stem cell laboratory techniques and methods in the US by a leading stem cell biologist

Novel stem cell priming methods & technology

Leading edge granulocyte & stem cell activation methods

Customized dietary, supplement & drug regimens

Top flight hospitals & 24 hour medical & nursing residence available

## Immunologic & Metabolic Oncology
