

NOVA CELLS HEALING TOUCH

SPINA BIFIDA SUCCESSES!

Turnarounds in children growing by leaps & bounds

People who go the Vegas and rack up lots of wins are acclaimed lucky because they beat the odds. When a medical treatment's successes swell we rightly call this the fruit of hard work and careful experimentation (Think Thomas Edison and his comment that "genius is 1% inspiration and 99% perspiration). And it is just such toil and painstaking work that has made NCIM's stem cell and Beacon Factor treatment of spina bifida a winner.

A glance around the Nova Cell's website at

"...about an hour after the treatment Ryan did something incredible – she started to move her toes and then lifted her left leg about three times!" ` Michelle Neighbors (9-2013)
